

Husain Ilyasbhai Vanak

Surat, Gujarat, India

+91-9099165788 | 2005hussainvanak@gmail.com Professional Summary

Motivated Python Developer with 4+ years of experience building scalable web applications using Flask. Proficient in backend development with Python, RESTful APIs, SQL databases, and integrating front-end technologies including HTML, CSS, and basic JavaScript. Strong focus on clean code, API design, and full-stack web development. Eager to contribute to explainable AI and innovative web solutions.

#### Technical Skills

- Languages: Python (expert), JavaScript (basic), HTML5, CSS3
- Frameworks & Libraries: Flask, Jinja2, SQLAlchemy
- Databases: SQL (MySQL, PostgreSQL), SQLite
- APIs & Tools: RESTful API development, Postman, JSON, Git, GitHub
- Other: Web development (full-stack basics), Responsive design, Unit testing (pytest), Virtual environments (venv/pipenv), Deployment (Heroku, basic Docker)
- Concepts: OOP, MVC architecture, Data modeling, Debugging, Agile/Scrum

#### Professional Experience

##### Python Web Developer

TechSolutions Pvt. Ltd., Ahmedabad, Gujarat

June 2022 – Present

- Developed and maintained multiple Flask-based web applications, handling user authentication, data processing, and dynamic content rendering with Jinja2 templates.
- Designed and implemented RESTful APIs to support frontend integration, enabling seamless data exchange and reducing response times by 30% through optimized queries.
- Built responsive user interfaces using HTML, CSS, and vanilla JavaScript (including form validation and AJAX calls for dynamic updates).
- Integrated SQL databases (PostgreSQL/MySQL) with SQLAlchemy ORM for efficient CRUD operations and complex reporting features.
- Collaborated with cross-functional teams to deploy features using Git workflows and basic CI/CD practices.

##### Junior Python Developer

InnoWeb Services, Ahmedabad, Gujarat

January 2020 – May 2022

- Created lightweight web tools and internal dashboards using Flask micro-framework, incorporating HTML/CSS for clean UI and basic JavaScript for interactivity.
- Developed API endpoints for third-party integrations, handling authentication (JWT) and data validation to ensure secure and reliable communication.
- Performed database design and management using SQL, writing efficient queries and stored procedures to support application logic.
- Contributed to code reviews, debugging, and testing, improving overall code quality and reducing bugs by 25%.

##### Web Development Intern

StartUp Hub, Ahmedabad, Gujarat

June 2025 – December 2025

- Assisted in building small-scale web applications with Python Flask backend and HTML/CSS/JavaScript frontend.
- Gained hands-on experience with API consumption and basic full-stack development workflows.

Projects (to showcase hands-on skills)

Task Management Web App (Personal Project) – GitHub: [\[link\]](#)

- Full-stack application built with Flask (backend), SQLite/PostgreSQL (database), HTML/CSS/Bootstrap (frontend), and basic JavaScript for real-time updates.
- Implemented user registration/login, CRUD operations via REST APIs, and task filtering/sorting features.

REST API for E-commerce Backend

- Developed a Flask-based API with endpoints for products, orders, and user management.
- Used SQLAlchemy for database interactions and Postman for testing/documentation.
- Focused on secure practices (input validation, error handling) and scalability.

Education

Bachelor of Computer Applications (BCA)

[Your University Name], Ahmedabad, Gujarat

2016 – 2019

- Relevant coursework: Web Development, Database Management Systems, Programming in Python

Certifications

- Python Certification (e.g., PCAP – Certified Associate in Python Programming) – 2021
- SQL Fundamentals (e.g., HackerRank or Coursera) – 2020
